

Mian Sameer Zahid

San Francisco, CA | sameerzahid@uni.minerva.edu | +1 415 4237 212 | [Portfolio](#) | [GitHub](#) | [Medium](#) | [LinkedIn](#)

EDUCATION

Minerva University

Bachelor of Science in Computational Sciences and Business, GPA: 3.81

San Francisco, CA

Sep 2021 – May 2025

- Courses: Data Structures & Algorithms, Machine Learning, AI Agents, Observability, Stats & Probability
- Lived and studied across seven global tech hubs: San Francisco, London, Seoul, Berlin, Buenos Aires, and Taipei

EXPERIENCE

Lindy AI

Forward Deployed Engineer

Hybrid

July 2025 – Present

- Lead 50+ AI agent demos and multi-stakeholder scoping cycles, optimizing incentive structures to maximize pipeline conversion across diverse enterprise use cases
- Architected & deployed 75+ AI automation systems across 28+ enterprise clients representing \$1.5M+ book of business
- Engineered 100+ API integrations including Twilio, HubSpot, Microsoft, Google, Lawmatics, Pipedrive ecosystems
- Delivered 10+ enterprise conversational/RCS AI solutions including lead qualification & automated scheduling agents

otom8

Founder & Forward Deployed Engineer

San Francisco, CA

June 2022 – Present

- Architected a production AI automation platform solo — scoped customer workflows and shipped end-to-end solutions
- Designed white-labeled multi-tenant workspace with per-client isolation, custom branding, & admin impersonation tool
- Built production human-in-the-loop AI agents: daily briefing agent and Telegram coding agent with approval gates
- Owned full CI/CD pipeline (GitHub Actions → Docker → DigitalOcean) with health checks and zero-downtime deploys
- Integrated Clerk, Google/Microsoft OAuth, & DigitalOcean into unified SSO layer without disrupting existing systems
- Led customer discovery sessions to scope automation requirements and translate pain points into delivery specs

SportSpot

Founder & Generalist

San Francisco, CA

August 2024 – May 2025

- Led end-to-end sales cycles for 20+ venue clients across 2 countries, owning stakeholder communication and onboarding
- Defined SOWs with venue owners, scoping platform capabilities to operational needs and aligning delivery timelines
- Led GTM strategy across new markets, managed partner relationships & built adoption playbooks for venue operators
- Designed & deployed a modular system with React, Next.js, TypeScript, FastAPI & PostgreSQL, with unit testing

The Not Company (NotCo)

ML Intern

Buenos Aires, Argentina

August 2023 – December 2023

- Streamlined the transfer of 5k+ nutrient data from Excel into NotCo's proprietary database using SQL
- Set up data-pipelines for fine-tuning Giuseppe, NotCo's AI model, improving taste-based nutrient matching by 9%
- Engineered a python-based evaluation layer for recipe formulation assessing market viability of generated combinations

Google Developer Student Club (GDSC)

Machine Learning Instructor

San Francisco, CA

August 2022 – May 2023

- Led and instructed a 2-month intermediate Machine Learning course to 80+ students at Minerva University GDSC
- Mentored students to apply deep learning by creating an attention-based Image Captioning model in TensorFlow

PROJECTS

Text Generator | *Python, Transformer Models, Random Forest Models, XGBoost*

December 2024

- Trained a writing style emulator transformer, enhancing the preprocessing pipeline with tokenization/text augmentation

Smile Detection/Generation | *Python, CNN, CycleGANs, Data Aug, Deep learning*

September 2024

- Developed an ML pipeline to classify smiling/non-smiling images using CNNs, later augmenting it to 14k images
- Integrated CycleGANs to generate smiling images and evaluated performance using Frechet Inception Distance

Task Manager | *Java Spring Boot, React, PostgreSQL*

November 2024

- Built a full-stack task manager with nested subtasks, drag-and-drop organization, and user authentication
- Implemented RESTful APIs with Spring Boot and dynamic UI in React, ensuring secure session management
