

AI Agent Portfolio

Client Work Summary

Custom agents and automation systems: triggers, orchestration, CRM integrations, and measurable time savings.

40+	Production workflows
12+	Industries served
20+	Integrations

Last updated: May 2026

Major ultra-low-cost airline — Baggage claims voice agent

Baggage intake phone agent — Inbound calls trigger a multi-step voice workflow that looks up reservations, confirms affected passengers, and walks callers through baggage file creation (missing articles, contact info, address updates, file status). Integrates with internal search APIs and structured field mapping; escalates to humans when lookup fails. **Impact:** Replaces long hold-time scripting for routine claims; estimated **15–25 minutes saved per call** for agents who previously handled intake manually.

Estate planning law firm — Lead conversion & scheduling

Outbound phone agent — Fires on new CRM leads (webhook + live conversation): calls leads immediately, qualifies trust/will intent, and routes through modular conversation states (availability, confirmation, office-closed, error handling). Integrates with **Lawmatics** CRM, **Outlook** calendar and email, and **Twilio** voice/SMS. **Impact:** Firm runs **15–20 leads/day** at ~25% booking today; target **50%+ conversion** — roughly **4–6 extra appointments/day** without added staff.

Appointment reminder agent — Calendar event triggers send confirmation and reminder sequences (1 week, 3 days, 1 hour) with reschedule handling. **Impact:** Cuts no-shows and paralegal reminder work — estimated **1–2 hours/day** across the intake team.

Family law firm — Intake & booking phone agent

Divorce intake phone agent — Inbound calls collect caller and spouse names, run conflict checks, qualify case basics, check **Google Calendar** availability, book consults, and send confirmation emails; conflict paths log to **Google Sheets** and send deferral emails. **Impact:** After-hours and overflow intake without front-desk staff — **~30–45 minutes saved per qualified lead**.

Law firm (email & document ops) — Inbox and intake automation

Email assistant (built for demo → production scope) — **Outlook + Clio + Decision Vault:** triage and label every inbound message, same-day client auto-reply for partner compliance, document intake checks three days before meetings, billing FAQ drafts, and internal scheduling with calendar availability. **Impact:** Scoping targets **~2 hours/day** per attorney when rolled firm-wide; automates a 24-hour response rule no human team could enforce at volume.

Insurance brokerage — Policy document pipeline

PDF extraction → analysis — New files in **Google Drive** trigger OCR and markdown extraction, client name parsing, tracker updates, and LLM policy analysis. **Insurance analysis → CSV** — Workflow message triggers read tracker, analysis and revision prompts, CSV generation, and template upload. **File management agent** — Cleans and reorganizes tracker rows by client and folder. **Impact:** Hours of manual PDF reading per renewal batch → **~70–80% faster** turnaround; estimated **5–10 hours/week** for operations.

Childcare software company — Salesforce support automation

Support case agent — **Salesforce** instant triggers on new cases: pulls account context, searches desktop and online knowledge bases, drafts replies in brand voice, scores confidence, routes enterprise accounts to humans, and closes or updates cases. **Email triage variant** — **Microsoft Outlook** inbound classifies support topics and structures responses. **Impact:** First-response drafting at high case volume — estimated **10–15 minutes saved per ticket**, hundreds of cases per month.

E-commerce retailer (hemp/cannabis) — Omnichannel support

Customer support agent — **Freshdesk** webhook plus live chat: reads SOP spreadsheets first, pulls **WooCommerce** orders and **Shipstation** data, prepares replies, logs evaluations, escalates to Slack channels (customer-support, social-media, errors). Separate **influencer intake** state for partnership tickets. **Impact:** Tier-1 ticket handling at scale — **8–12 minutes saved per ticket** on a 90+ step workflow.

Mortgage lender — CRM lead nurture & SMS scheduling

Pipedrive lead nurturer — New and updated deals trigger contact lookup, email assignment, and multi-touch nurture (calls, timed emails, SMS on day 3/10/17, monthly touches). **SMS appointment agent** — **Twilio** SMS plus **Google Calendar** for reschedule flows. **Sheet-triggered outreach** — Row added to **Google Sheets** plus **Gmail** sequences for purchase vs refinance tracks. **Impact:** Automates follow-up on engaged leads — **couple hours/day** of loan officer admin.

Insurance agency (franchise office) — Outbound qualification

Multi-channel outreach agent — Orchestration trigger drives coordinated **phone calls**, **SMS**, and **email** sequences with timed follow-ups, voicemail tracking, and response branching. Separate conversation states for SMS vs email templates directing document upload. **Impact:** Replaces manual dialer and inbox monitoring — estimated **2–3 hours/day** per producer.

Disaster restoration company — 24/7 phone routing

Emergency intake phone agent — Inbound calls assign office by ZIP (custom routing logic), load regional **calendar** context, triage emergencies, and schedule or transfer. **Impact:** Night and weekend coverage without on-call coordinators — **~20–30 minutes saved per after-hours call**.

Moving & storage — After-hours quotes

Phone quote agent — Collects move details, runs quote algorithms, sends **Gmail** confirmations, logs to **Google Sheets**; strict rules on compensation and special items (piano, safe, etc.). **Impact:** Captures leads outside business hours that would otherwise hit voicemail — **1–2 booked estimates/week** recovered.

Medical aesthetics clinic — Consultation booking

Inbound phone agent — Live conversation trigger; multi-state flow (qualifier, slot presentation, confirmation, office-closed) collects lead name, phone, and email and books consults. **Impact:** Front-desk call volume offload — **~15–20 minutes saved per booking call**.

Public health organization — Research automation

County program discovery bot — Scheduled runs search state and county sites for overdose and opioid response teams and append best results to **Google Sheets** by county. **Impact:** Manual jurisdictional research compressed to automated sweeps — **hours per research cycle** saved.

B2B development agency — Outbound sales email system

AI email agent — Inbound workflow messages kick off cold sequences: company and prospect context, four-email cadence with waits, news search, contact tracker updates, reply handling with pain-point context. **List-driven outreach variant** for Apollo-style lists. **Visitor webhook nurture** — Enrichment → three-email sequence with timers. **Daily email automation** — Scheduled batch processing. **Impact:** SDR-style outreach without a dedicated BDR — **~10–15 hours/week**.

LED lighting manufacturer — B2B prospecting

Electrical contractor lead extractor — Searches contractors by region (Texas, California, etc.), dedupes emails in **Google Sheets**, sends personalized LED outreach. **Impact:** Replaces manual list building — **~5–8 hours/week** of sales research.

Product analytics SaaS client — Release intelligence engine

Per-PR pipeline — **GitHub** webhook on merge: gate checks (human author, merged to main), **Linear** ticket ID from branch name, LLM classifies change (customer impact, CS/sales flags), writes **Google Sheet** row, routes **Slack** alerts to CS, Product, and Engineering by type. **Batch pipeline** — Every 15 days: groups PRs, generates release doc and PDF, posts to product, sales, CS, and engineering Slack channels. Optional **Notion** doc updates for breaking changes and new features. **Impact:** Eliminates manual release comms — **hours per release cycle** → minutes; Sales and CS briefs same day as ship.

Engineering analytics startup client — Impact dashboard

Engineering impact dashboard — Built for a client evaluating engineering productivity tooling: ingested **90+ days** of real **GitHub** PR, review, and commit data from a major open-source repo, defined a multi-signal impact model (not lines-of-code), and shipped an interactive single-page dashboard ranking top contributors with explainable scoring. Hosted for leadership review. **Impact:** Replaces subjective “who carried the release” debates with auditable metrics — **~1–2 hours saved per sprint retrospective** for engineering leads.

Marketing agency — CEO inbox operations

CEO email triager — **Gmail** trigger categorizes into nine-plus playbook categories (support, FYI, notifications, etc.), drafts responses, archives promos after timed waits. **Executive assistant agent** — Drafts replies, color-coded routing labels, 48-hour follow-up, send-after-approval flow. **Impact:** Executive inbox volume no human could triage fully — **~1–2 hours/day** for leadership.

PPC / Google Ads agency — Client onboarding automation

Webhook provisioning agent — Incoming webhook creates segmented **Google Drive** folder structures (lead gen, traffic, e-commerce templates) and returns folder IDs for new client setups. **Impact:** **~30–45 minutes saved per new client onboard.**

Social media agency — Meetings & client knowledge

Meeting note-taker — **Calendar** start triggers recording, transcript to **Google Doc**, email notes to attendees, chat Q&A on meetings. **Slack client-info helper** — `@clientinfo`` in Slack loads client row from **Google Sheets**, loops **Google Docs** for answers with citations. **Impact:** **30–60 minutes saved per client meeting** on notes and doc hunting.

Influencer marketing firm — Deal tracking

Gmail sent-message watcher — Tracks pitch threads, reminds managers on missed pitches, logs secured deals and escalations. Separate flows for influencers vs management. **Impact:** Stops deals slipping through inbox — **3–5 hours/week** of coordinator follow-up.

Virtual assistant services — Client onboarding emails

Booking follow-up agent — **YouCanBookMe** new booking plus workflow messages: pulls context, sends email sequence, tracks sends, two-day waits, optimization updates, meeting tracking. **Impact:** Consistent nurture post-booking without manual VA sends — **~20 minutes saved per new client.**

Medical supplies distributor — Website chatbot

Lead capture embed bot — Website embed collects name, email, and phone before handoff; fast routing to the right conversation state. **Impact:** 24/7 qualification vs missed chat leads — **5–10 leads/month** captured off-hours (typical SMB estimate).

Real estate brokerage — Website chatbot

Lead capture embed bot — Same embed pattern tuned for property inquiries and contact capture. **Impact:** Off-hours lead capture without an on-call agent.

Expense / finance ops — Receipt automation

Receipt agent — **Gmail** receipt emails plus weekly schedule: matches senders to **BILL Spend & Expense** open transactions, uploads attachments (including generated PDFs for body-only receipts), drafts filed and mismatch replies; Friday proactive missing-receipt drafts. **Impact:** Full receipt-to-transaction loop — **~15–30 minutes saved per receipt** at volume.

Accounting firm — Document intake

PDF extractor — **Gmail** attachments trigger email, folder, and link extraction for downstream processing. **Impact:** Eliminates manual download and sort — **~10 minutes per document batch**.

Personal brand / executive — Email triage

Email triage agent — **Gmail** received: categorizes, marks promos read, archives after 6–24 hour delays. **Impact:** Inbox maintenance — **~30–45 minutes/day**.

Real estate professional — Task assistant

Scheduler agent — **Slack**, email, and chat triggers update task lists, clear completed items, email daily task summaries. **Impact:** **~20–30 minutes/day** of manual list management.

Networking / research — Voice briefing agent

Live research phone agent — Inbound call: resolve a person from minimal hints, research via search, people-data, and LinkedIn, deliver a cited brief plus live Q&A. Ethical guardrails on public data only. **Impact:** **30–60 minutes** of pre-meeting manual research per contact.

Cleaning-industry SaaS — Prospecting (scoped & built)

Outbound lead gen agent — Scheduled, LinkedIn, and CSV triggers: find cleaning companies \$250K+, enrich, qualify, outreach. **Impact:** CEO priority to “touch more” — designed to 2× seller reach without new headcount.

Creative agency — Research & outreach (scoped)

Research & outreach workflow — Weekly scheduled or Slack-triggered: scrape and enrich lists, deep research, personalized drafts, **HubSpot** push. **Impact:** Replaces **couple hours/week** of manual

prospecting per seller across a four-person sales team.

Consulting client — Usage tiering model

Tiering calculator & model — Python tiering model and spreadsheet tooling for packaging automation usage by client segment (not a voice/email agent, but shipped automation logic for GTM). **Impact:** Faster, consistent pricing conversations vs manual spreadsheet work.

Internal / misc.

Item	Notes
PDF OCR utility	Mistral-based PDF text extraction script for document pipelines
Video generation scripts	HeyGen batch video tooling for marketing content

Portfolio at a glance

Metric	Value
Production workflow agents	40+ distinct flows
Industries	Legal, airline, insurance, mortgage, e-commerce, SaaS, restoration, moving, healthcare, agencies, engineering analytics
Common integrations	Gmail, Outlook, Salesforce, Pipedrive, Lawmatics, Freshdesk, Slack, Google Drive/Sheets/Docs/Calendar, Twilio, WooCommerce, BILL, GitHub, Linear, webhooks, YouCanBookMe

Strongest hero projects

1. Major airline — baggage voice intake
2. Childcare software — Salesforce support automation
3. E-commerce — Freshdesk omnichannel support
4. Product analytics SaaS — release intelligence engine
5. Estate planning law firm — lead conversion phone + reminders
6. Insurance brokerage — PDF → analysis → CSV pipeline
