Experience

Giga AI — **San Francisco, CA**
Forward Deployed Engineer — *Jul 2026 – Present*

- Own 10+ enterprise voice and chat AI deployments end to end: scoping, client demos, build, launch, weekly reviews
- Lead engineer on a vet clinic chain's phone agent: booking, symptom triage, IVR routing, Vetspire and Gladly APIs
- Halved voice reply latency (3s to 1.5s) by tracing every turn in the LLM logs and moving work off the critical path
- Built a pipeline from client call recordings to a live agent (5,124 calls analyzed in 2 days for $9), used by 10 FDEs
- Built an IVR crawler: a probe voice agent dials a phone tree, presses DTMF keys, and maps every path for testing
- Showed 60% of a fintech's escalations were API-fixable from ticket data, raising its containment ceiling from 80% to 92%
- Shipped 30+ core platform PRs in 2 months: realtime and batch speech-to-text APIs, Zendesk escalation tags
- Automated FDE ops: cross-client KPI and alert dashboard (Next.js, Postgres), regression eval suites, Slack alerts

Lindy AI — **San Francisco, CA**
Forward Deployed Engineer — *Jul 2025 – Jun 2026*

- Led 50+ technical POCs and scoping cycles with enterprise prospects, co-building agents that converted pipeline
- Architected 75+ AI agents with governed actions, RAG, and eval harnesses for 28+ clients ($1.5M+ book of business)
- Engineered 100+ tool-calling integrations: Twilio, HubSpot, Microsoft, Google, Lawmatics, Pipedrive
- Delivered 20+ prompt-engineered agents for lead qualification, scheduling, and retrieval-augmented automation

otom8 — **San Francisco, CA**
Founder — *Jun 2022 – Present*

- Built an agentic AI platform, scoping potential client workflows and shipping reusable accelerators
- Designed a white-labeled, multi-tenant workspace with per-client isolation, custom branding, and admin impersonation
- Built production human-in-the-loop agents with context engineering, RAG, MCP tool calling, and approval gates
- Integrated Clerk, Google and Microsoft OAuth, and DigitalOcean into one SSO layer with zero disruption to users
- Owned CI/CD (GitHub Actions, Docker, DigitalOcean) with health checks and zero-downtime deploys
- Led discovery calls to scope agent requirements, build eval harnesses, and turn pain points into delivery specs

SportSpot — **San Francisco, CA**
Founder — *Aug 2024 – May 2025*

- Led end-to-end sales cycles for 20+ venue clients across 2 countries, owning stakeholder communication and onboarding
- Defined SOWs with venue owners, scoping platform features to operational needs and aligning delivery timelines
- Drove GTM in new markets, managing partner relationships and building adoption playbooks for venue operators
- Designed and deployed the platform (React, Next.js, TypeScript, FastAPI, PostgreSQL) with unit tests

The Not Company (NotCo) — **Buenos Aires, Argentina**
ML Intern — *Aug 2023 – Dec 2023*

- Helped fine-tune Giuseppe, NotCo's AI model, improving ingredient search efficiency by 9%
- Built a Python eval layer that scores generated recipe combinations for market viability
- Migrated 5K+ nutrient records from Excel into NotCo's proprietary database using SQL and Java

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, Java
AI: LLM agents, tool calling, MCP, RAG, evals, voice AI (STT, TTS, IVR, DTMF), OpenAI and Claude APIs
Stack: React, Next.js, Node.js, FastAPI, PostgreSQL, Elasticsearch, Docker, GitHub Actions, AWS, Grafana
Integrations: Twilio, Salesforce, Zendesk, Gladly, HubSpot, Microsoft 365, Google Workspace, OAuth and SSO

Education

Minerva University — **San Francisco, CA**
B.S. Computational Sciences and Business, GPA 3.81 — *Sep 2021 – May 2025*

- Courses: Data Structures & Algorithms, Full Stack Development, Machine Learning, AI, Statistics & Probability
- Lived and studied in 7 cities: San Francisco, Seoul, Hyderabad, Berlin, Buenos Aires, London, and Taipei
- Taught ML to 160+ students as an instructor for Google Developer Student Club and iD Tech; TA for AI Algorithms
